RESEARCH INTERESTS

Primary: Political Economy, Economic History

Secondary: Development Economics

EDUCATION

Ph.D. in Economics 2022– 2026 (expected)

Centro de Estudios Monetarios y Financieros (CEMFI)

Visiting scholar Spring 2025

Uppsala University - Sponsor: Luca Repetto

MSc in Economics and Finance 2020 – 2022

Centro de Estudios Monetarios y Financieros (CEMFI)

MSc in Economics 2018 – 2020

Universitat de Barcelona

B.A. in Economics 2012 – 2016

Universitat de Barcelona

JOB MARKET PAPER

“Autocrats Remake the State: Evidence from Francoist Spain” (joint with Ricard Grebol)

After the Spanish Civil War (1936–1939), the Francoist regime launched a political purge of the teaching workforce to ensure ideological conformity. In this paper, we construct a novel dataset by digitizing and linking purge and administrative records that track teacher careers and municipal-level staffing before and after the purge. Using these data, we study how the large-scale purge of public service workers affected workforce composition and local service provision. We document three main findings. First, the dismissals disproportionately targeted highly competent teachers, reducing the overall quality of the teaching force. Second, the purge lowered average teacher experience by about 4.3 years. Third, although the regime sought to mitigate local teacher shortages through new hires and reallocations, coordination frictions in this process led to unintended shortages even in municipalities unaffected by the purge. Taken together, these results show that large-scale personnel reforms under autocratic rule can erode state capacity and weaken the delivery of essential public services.

WORKING PAPERS

“Seeds of Prejudice: The impact of British colonization on attitudes towards sexual minorities” (joint with Alexsandros Cavgias) - Submitted

This paper provides the first causal test of the widely debated hypothesis that British colonial institutions promoted sexual prejudice—defined as negative attitudes toward sexual minorities—in postcolonial societies. We document five main findings. First, after accounting for differences in contemporary economic development, OLS estimates from a cross-country sample of former European colonies reveal that former British colonies exhibit higher sexual prejudice than those of other European powers. Second, Geo-RDD estimates show that former British colonies have significantly greater sexual prejudice than former Portuguese colonies in Southern and Eastern Africa, where local norms did not systematically condemn same-sex relations. Third, Geo-RDD estimates indicate that former British and French colonies display similar levels of sexual prejudice in Western Africa, where a higher share of the population adheres to religious norms condemning same-sex acts. Fourth, additional evidence from areas in South America and Southeast Asia not characterized by homophobic social norms before colonization reinforces the external validity of our findings from Southeastern Africa. Finally, mechanisms analysis suggests that the persistence of sodomy laws fully accounts for the negative association between British colonial origin and contemporary sexual prejudice across countries. Overall, our results indicate that British colonial origin notably increased sexual prejudice in societies with social norms different from the penal codes imposed by colonizers.

“Personalized Employment Support for the Homeless: Evidence from a Randomized Evaluation” (joint with Miguel Almunia and Begoña Varela Merino) - Submitted

We evaluate the impact of a randomized intervention designed to promote labor market integration among people experiencing homelessness in Spain. Participants were randomly assigned to either a personalized employment program, featuring intensive caseworker support and financial assistance, or to the traditional employment model. Short-term results show substantial gains for the treatment group in housing stability, employment, income, and life satisfaction. However, these differences largely

dissipated after six months, as the outcomes of those in the traditional model improved. The findings highlight both the potential of personalized approaches to accelerate integration and the challenges of sustaining long-term effects in homelessness interventions.

WORK IN PROGRESS

“Ballot measures, political advertising, and contribution caps” (joint with Pello Aspuru)

“When should I expect the Spanish Inquisition? The Economics of Denunciations” (joint with Álvaro Sánchez-Leache)

CONFERENCE AND SEMINAR PRESENTATIONS

III Workshop in Economic History (Uppsala), III Spanish Workshop in Development Economics, Madrid Empirical Social Sciences Conference 2025

SITES-GLO Annual Conference, II Spanish Workshop in Development Economics, Simposio Asociación Española de Economía 2024

PRE-PhD PUBLICATIONS

“Globalisation and natural resource abundance. Is export diversification possible? A comparison of export composition in Chile and Norway, 1870-2017”, with Marc Badia-Miró, José Peres-Cajías and Anna Carreras Marin. *Natural Resources and Divergence: A Comparison of Andean and Nordic Trajectories*, 2021. Palgrave Macmillan. DOI: [10.1007/978-3-030-71044-6_2](https://doi.org/10.1007/978-3-030-71044-6_2)

RESEARCH EXPERIENCE

CEMFI, Research Assistant for Professor Monica Martinez-Bravo (part-time) 2021 – 2023

Universitat de Barcelona, Research Assistant for Professor Marc Badia-Miró (part-time) 2018 – 2019

TEACHING EXPERIENCE

Uncertainty and Information (Microeconomics II) Winter 2024, Winter 2025
CEMFI - TA for Professor Guillermo Caruana

Markets and Organizations Spring 2023
CEMFI – TA for Professor Guillermo Caruana and Wouter Vergote

PREVIOUS WORKING EXPERIENCE

Sant Cugat del Vallès City Council – Project officer Apr 2018 – Sep 2018

PricewaterhouseCoopers – Business Consultant Aug 2016 – Apr 2018

GRANTS, FELLOWSHIPS AND AWARDS

CEMFI doctoral fellowship, María de Maeztu Unit of Excellence 2022 – 2026

María de Maeztu Scholarship 2020 – 2022

Extraordinary award for the MSc (Universitat de Barcelona) 2020

Fundació Catalunya La Pedrera Scholarship 2018 – 2020

Extraordinary award for the B.A. (Universitat de Barcelona) 2016

I acknowledge financial support from Grant PRE2022-102202 funded by MCIN/AEI/ 10.13039/501100011033 and by “ESF +”, the María de Maeztu Unit of Excellence CEMFI MDM-2016-0684 and CEMFI CEX2020-001104-M, funded by MCIN/AEI/10.13039/501100011033, and CEMFI.
